

Two complementary categories of AI solutions

| 1

Cognitive solutions

The thinking brains

Robotics solutions

The acting bodies

Currently existing vs. future AI solutions

| 2

ANI

Artificial **Narrow** Intelligence

Currently existing, very specialized
AI solutions focusing on narrow areas;
they are usually good at doing one thing

Weak AI

AGI

Artificial **General** Intelligence

Much more universal and powerful future AI
solutions, which could replace human thinking
and acting in a broader sense

Strong or true AI
